WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut ten lengths of 300 from 32 x 3 fibreglass tube; round and seal the ends

Drill a 10 hole straight across at mid length (150 from each end)

Sling: 1.2 m of 6 mm cord through the hole, tied into a loop with a double fisherman's knot that sits under the toggle

Hitch the loop to the pull rope with a three-turn prusik hitch (it slides when loose and grips when pulled)

Space the toggles 1 m apart, the first 11 m from the hook head

Check: hang 30 kg on one toggle; the prusik must not slip

BREAKHOOK

github.com/BoujeeEnjinia1701/breakhook

Hauling toggle (make 10 per set): making sketch
